DETAILED ACTION

This Office Action is in response to the Applicant's remarks filed April 12, 2004.

Allowable Subject Matter

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose, make obvious, or otherwise suggest the structure of the applicant's together with the other limitations of the independent claims, in particular "A split gate flash memory cell, comprising: a substrate having a trench therein; a conductive layer disposed on the bottom of the trench; a pair of source regions, each disposed the substrate adjacent to one sidewall of the trench and electrically connected by the conductive layer; a source isolation layer disposed on the conductive layer; a pair of tunnel oxide layers, respectively disposed on one sidewall of the trench and on the source isolation layer; a U-shaped floating gate having a plurality of inside tips disposed on the source isolation layer and contacting tunnel oxide layers thereby; an inter-gate dielectric layer disposed on the U-shaped floating gate; a control gate disposed on the inter-gate dielectric; a conductive stud disposed on the control gate; and a drain region disposed in the substrate adjacent to the trench.". The dependent claims being further limiting and definite are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to split gate trench devices:

Hirayama (US 2002/0175365 A1)	Kadakia et al. (5,078,498)
